

Reversing Sensors

Car Essentials Parking Sensor Kits

Our parking sensors detect obstacles using ultrasonic technology by emitting a cone of sound behind the car which bounces off obstacles and returns to the sensor.

Our quality is comparable to most popular "branded" kits available on the UK market but without the brand name and brand price.

We offer a no quibblereturns policy. Our kits are guaranteed against manufacturing defects for a period of 12 months from date of purchase.

Click on the models below for their key features and technical specifications.

Please note: parking kits are a driver assistance device and is not substitute for driver responsibility.
