

REV008

REV008 Eight Sensor Kit

Key Features

- 8 Angled sensors (should be mounted at least 50cm from ground level)
- 4 Front sensors work while braking and 4 rear sensors work while reversing
- Can be colour coded
- Suitable for use on passenger and 12V commercial vehicles
- Includes 21 metre wiring length
- Includes 20.5mm circular drill bit
- 10 Units per carton
- Control Box and buzzer which gives audible beeps with increasing frequency as you approach an obstacle.

Technical Specification

- Working voltage range 12V(12 ~ 16V DC)
- Rated Current 10mA ~ 300mA
- Detection Distance 0.4 ~ 1.5m
- Sensor Frequency 40KHz
- Working temperature of control box -30 ~ +70
